

Andrews Residence

TENNIS COURT RECONSTRUCTION

PREMIER
SPORTS & LEISURE
#1 In Sports Surfacing

CLIENT: The Andrews
DURATION: November 2020
SURFACE: Synthetic Grass

This project is by far one of the best we have ever completed. The court itself was very old, damaged and in need of a revamp.

The existing synthetic surface was pulled up and was replaced with a new Premier Synthetic Grass Surface.

The team not only resurfaced the court, but we designed, and manufactured a fence specifically for this court. The fence was hand made in the Premier shed, then sent to powder coating before being installed on site, bay by bay.

We also created a hit up wall, custom futsal goals, as well as supplying and installing a Basketball tower.

Many things to make this project one of the best we have ever completed, however the clients made the project for us, and we are proud that we were the company that got to complete this project for the Andrews.
